

CEMIX ROOF AND GUTTER WATERPROOFING SYSTEM BPIR DECLARATION

Version 1.0 October 2023

DESIGNATED BUILDING PRODUCT: Class 1

DECLARATION

Cemix Products Ltd (Cemix) has provided this declaration to satisfy the provisions of the [Building \(Building Product Information Requirements\) Regulations 2022](#).

COMPANY DETAILS

Name	Cemix Products Ltd
Role	Supplier
NZBN	9429031177702
Address	19 Alfred St, Onehunga, Auckland 1061
Website	www.cemix.co.nz
Email	info@cemix.co.nz
Phone	09 636 1000

DESCRIPTION OF BUILDING PRODUCT

Cemix supplies Roof & Gutter Repair Tape, Rubberguard Peel and Stick Tape, and Roof & Gutter Waterproofing Membrane. These products are intended to be used together to waterproof roofs, gutters as well as cementitious, metal and timber surfaces.

The membrane is a grey, flexible, UV resistant, rubber-based waterproofing membrane intended for use in external applications.

Roof & Gutter Repair Tape is a self-adhesive, bitumen-impregnated tape intended for use as a flashing and sealant of roofs and gutters.

Rubberguard Peel and Stick Tape is a self-adhesive tape intended for use as reinforcing to corners and junctions.

SCOPE OF USE & LIMITATIONS

The membrane and tape are intended for use as a waterproofing system for the following roof and gutter substrates,

- cementitious
- metal, and
- timber.

The system must be applied to a structurally sound, securely fastened and supported substrate. This will avoid substrate movement related cracking. The substrate should also be dry.

Where the system is to be used over a cementitious substrate, then the surface should be primed with a Cemix primer.

The tapes must never be used as an exposed flashing. Roof & Gutter Repair Tape cannot be applied to masonry.

The membrane can be left exposed or painted over. It should not be applied if the humidity is > 85% or if rain is expected within 48 hours.

CONTRIBUTION TO BUILDING WORK CODE OBLIGATIONS

When used in building work, the Roof & Gutter Waterproofing system will contribute to building code compliance of the building work. The use of rubber-based waterproofing membranes is well established in NZ and similar membranes have been appraised by BRANZ and found to comply with the following provisions of the building code.

B2 (Durability), B2.3.1(b).

E2 (External Moisture), E2.3.1, E2.3.2.

F2 (Hazardous Building Materials), F2.3.1.

FOR FURTHER INFORMATION

The Roof & Gutter Waterproofing system must be used in accordance with all information supplied by Cemix Products Ltd.

For supporting information refer to www.cemix.co.nz/waterproofing/.

RESPONSIBLE PERSON

In accordance with Regulation 8, as the responsible person I confirm that the information supplied in this declaration is based on information supplied to the company as well as the company's own processes and is therefore to the best of my knowledge, correct.

I can also confirm that the Roof & Gutter Waterproofing system as referred to in this statement is not subject to a warning or ban under [s26 of the Building Act](#).
