DETAILS

NOTE: Due to updates in progress, packaging may vary.

### DESCRIPTION:

CEMIX® CEMPLUS is a highly concentrated, non-staining, liquid plasticiser, designed to improve the workability and adhesion of exterior use plaster and mortar.

### TYPICAL USES:

CEMIX® CEMPLUS can be used as an air entraining additive for exterior use plaster and mortar, removing the need for adding lime to the mix.

### ADVANTAGES:

- Improves workability and bond strength
- Allows for quicker application
- Reduced cracking from shrinkage
- Minimises water absorption
- Minimises efflorescence
- Freeze resistant

### DOSAGE:

2ml to 3ml per kg of cement

### PREPARATION:

Refer to the manufacturer's recommendations for the exterior use plaster or mortar being used.

### MIXING:

1. Shake before use.
2. Add the product to the volume of water recommended for the mix.

Use 2ml to 3ml of product per kg of cement.

**Note:** Do not aerate the mixture by stirring over vigorously or for too long. Accurate measuring is essential as too much product can weaken the mix - use less product rather than more.

### APPLICATION:

Refer to the manufacturer's recommendations for the exterior use plaster or mortar being used.

### CLEANING:

Clean tools with water immediately after use.

### STORAGE & SHELF LIFE:

Up to 12 months when stored in the original, unopened packaging, in a dry place at 23°C and 50% relative humidity.

### LIMITATIONS:

Accurate measuring is essential as too much product can weaken the mix - use less product rather than more.

If your project requires Building Consent, please email [info@cemix.co.nz](mailto:info@cemix.co.nz) about the suitability of this product before use.

### TECHNICAL DATA:

APPEARANCE	White
APPLICATION TEMPERATURE	5°C - 30°C
<i>The data shown above reflects typical results based on laboratory testing under controlled conditions. Reasonable variations may occur on site.</i>
