

BITUPATCH

PERMANENT ASPHALT REPAIR FOR POTHOLE

AVAILABLE SIZE: 20kg

SCAN FOR
DETAILS

NOTE: Due to updates in progress, packaging may vary.

DESCRIPTION:

CEMIX® BITUPATCH is a ready to use, cold mix bitumen asphalt, designed for repairing potholes in asphalt roads, driveways and paths. It is simply and easily placed directly from the bag in to the hole.

TYPICAL USES:

- Potholes
- Speed bumps
- Ramps

ADVANTAGES:

- Ready to use

YIELD:

Approximate yield for 20kg bag: 0.01m³

PREPARATION:

Thoroughly clean the area to be filled or reinstated. It should be free of any loose and deleterious materials.

All substrates should be structurally sound, securely fastened and properly supported to eliminate any movement that may cause cracking.

For pothole repair, where possible, it is recommended to create a vertical edge to the hole for CEMIX® BITUPATCH to butt up against.

APPLICATION:

1. Place CEMIX® BITUPATCH on the area to be repaired. When repairing potholes, ensure the middle of the placed product is higher than the sides, by 5mm to 10mm depending on the repair area size. This will counteract subsidence caused by compacting.

2. Compact the hole. For best results, use a compacting plate or steel wheel roller. For smaller areas, use a large flat material, such as a timber post, compressed with a rubber mallet or similar.

CEMIX® BITUPATCH can be applied between 5°C to 30°C. However, for best results, use between 21°C to 30°C.

DRYING & CURING:

Drying time depends on the climate.

CLEANING:

Clean tools with a solvent thinner after use.

STORAGE & SHELF LIFE:

Up to 12 months when stored in the original, unopened packaging, in a dry place at 23°C and 50% relative humidity.

LIMITATIONS:

Product is not suitable for feathering i.e. forming thin edges.

If your project requires Building Consent, please email info@cemix.co.nz about the suitability of this product before use.

Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.
