PLIMORTAR

POWDERED PLASTICISER FOR MORTAR

AVAILABLE SIZE: 15KG

SCAN FOR DETAILS

NOTE: Due to updates in progress, packaging may vary.

DESCRIPTION:

CEMIX® PLIMORTAR is a powdered plasticiser, designed to improve the workability and adhesion of mortar.

TYPICAL USES:

CEMIX® PLIMORTAR can be used as an air entraining additive for mortar, removing the need for adding lime to the mix.

ADVANTAGES:

- Improves workability and bond strength
- Allows for quicker application

DOSAGE:

25g per kg of cement

PREPARATION:

Refer to the manufacturer's recommendations for the exterior use plaster or mortar being used.

MIXING:

1. Add the product directly to the mix during mixing. Use 25g of product per kg of cement.

Note: Do not aerate the mixture by stirring over vigorously or for too long. In general, a maximum of 2 minutes is recommended. Accurate measuring is essential as too much product can weaken the mix - use less product rather than more.

APPLICATION:

Refer to the manufacturer's recommendations for the exterior use plaster or mortar being used.

CLEANING:

Clean tools with water immediately after use.

STORAGE & SHELF LIFE:

Up to 12 months when stored in the original, unopened packaging, in a dry place at 23°C and 50% relative humidity.

LIMITATIONS:

Accurate measuring is essential as too much product can weaken the mix - use less product rather than more.

If your project requires Building Consent, please email info@cemix.co.nz about the suitability of this product before use.

Read Label Before Use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.

WARNING

HAZARD STATEMENTS:

- Causes skin irritation
- Causes serious eye irritation

SAFETY INSTRUCTIONS:

Wear protective gloves/protective clothing/eye protection/face protection.

RESPONSE:

Take off contaminated clothing and wash before reuse.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
