PLIMORTAR

POWDERED MORTAR PLASTICISER

AVAILABLE SIZE: 15kg

SCAN FOR DETAILS

DESCRIPTION

CEMIX® PLIMORTAR is a grey coloured powder plasticiser used in Portland cement based mixes. It is a pozzolanic formulation that consists of a combination of hydroxyl aluminium silicates and diatomite. CEMIX PLIMORTAR will extend a mortar or plasters board life and work time, reduce early stage drying and shrinkage of mortar joints, improve workability and enhance the tooling of the mortar joints without sacrificing the mortars compressive strengths.

SUITABLE PROJECTS

For use in site mixed Portland cement/sand mortars and plasters for the bonding of concrete masonry and clay bricks and for general plaster work. CEMIX PLIMORTAR will produce high workability mortars without the use of lime or other admixtures.

ADVANTAGES

- Less bulk - Reduction in bulk and weight over other plasticisers
- Improves adhesion and bond in site mixed mortars and plasters
- Provides a longer board life
- Guarantees excellent workability
- Excellent performance in all types of sand mixes, especially blended sands
- Produces mortars and plasters which are smooth, creamy and highly workable

MIXING

CEMIX PLIMORTAR is used at the rate of 1kg per 40kg bag of Portland cement used. Place in a suitable mixer or wheelbarrow 2/3 of the prescribed water, then all of the prescribed CEMIX PLIMORTAR and mix for two minutes. Add 1/4 of the prescribed

sand and all the prescribed cement and mix for an additional two minutes. Add the remaining sand and water then mix until the mortar or plaster has the desired workability, which in general is an additional 4 - 5 minutes for maximum workability.

CLEANING

Clean all tools with water and a brush immediately after use.

If medical advice is needed, have product container or label at hand. Read label before use. Keep out of reach of children.

WARNING

HAZARD STATEMENTS

- Causes skin irritation
- Causes serious eye irritation

PREVENTION

- Wear protective gloves/protective clothing/eye protection/face protection

RESPONSE

- Take off contaminated clothing and wash before reuse
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
- If eye irritation persists: Get medical advice/attention
- IF ON SKIN: Wash with plenty of soap and water
- If skin irritation occurs: Get medical advice/attention
