RENDACURE

CONCRETE CURING RESIN EMULSION COMPOUND

AVAILABLE SIZES: 5L | 20L

SCAN FOR DETAILS

DESCRIPTION:

Cemix® Rendacure is a resin emulsion which is applied to newly laid concrete surfaces to prevent moisture loss and to help ensure that the desired strength of the concrete is reached.

TYPICAL APPLICATION/USES:

- Cemix® Rendacure is a resin emulsion which forms a membrane film when applied to the surface of the newly laid concrete. This membrane prevents the rapid evaporation of moisture from the concrete and aids the development of concrete strength. Cemix® Rendacure contains a dye, which fades with time, to indicate areas treated.
- Cemix® Rendacure may be used on all types of concrete structures, particularly where other means of wet curing are difficult to carry out, such as sloping faces.
- Surfaces to which Cemix® Rendacure has been applied may be cement rendered, painted with a variety of coatings including resin emulsion, oil based and plastic types. Weathered film must be removed prior to treatment.
- For 100% removal of Cemix® Rendacure, a light acid etching may be used.

ADVANTAGES:

- Gives controlled concrete curing
- Allows slow moisture evaporation
- Quick and easy to use
- Safe – non toxic & non flammable
- Can be used on all types of concrete structures.

LIMITATIONS:

Weathered film must be removed (light acid etching) prior to overlay of subsequent toppings

APPLICATION:

Cemix® Rendacure is supplied ready for use, direct from the container, may be applied with a soft broom or low-pressure spray equipment. Application may begin as soon as the surface will receive it without marking or pitting the surface. Spraying will allow earlier application.

AGITATION:

Agitate product well prior to use.

COVERAGE:

6m²/L depending on the condition of the surface and the method of application. Ensure complete and even coverage in one application.

TECHNICAL DATA:

APPEARANCE:	White
MIN APPLICATION TEMPERATURE:	5 °C - 30 °C
<i>The data shown above reflects typical results based on laboratory testing under controlled conditions. Reasonable variations may occur on site.</i>	

STORAGE & SHELF LIFE:

Cemix® Rendacure can be stored for 12 months in original, unopened containers when stored in dry conditions between 5 °C and 30 °C. Keep containers closed in a well ventilated area when not in use. Do not expose to direct sunlight in storage.

CLEANING:

Clean all tools with water & brush immediately after use.
