## GENERAL MORTAR PLASTICISER

AVAILABLE SIZES: 700gm, 1.2kg, 2.5kg

SCAN FOR DETAILS

### DESCRIPTION:

CEMIX® EASYPLI powder has been formulated especially for the bricklayer and block layer who is looking for a high yield, low cost, plasticiser using a combination of non-toxic, non-staining chemical powders. CEMIX® EASYPLI will meet the needs of the tradesman by giving good extension to board life, excellent workability, good hold on the trowel and reduces water content. CEMIX® EASYPLI meets the requirements of NZSS and ASTM when used in accordance with directions for dosage and mixing.

### TYPICAL APPLICATION/USES:

CEMIX® EASYPLI can be used for all Portland cement/sand mortars for bricklaying, block laying and plastering. The addition of lime and admixtures is not needed. This product can be used for coloured mortars including black oxide and white cement.

### ADVANTAGES:

- Easy to use powder
- Reusable watertight container
- Cost effective
- Longer board life
- Non-staining
- Excellent hold
- Increased bond strength
- Use on all sand types
- Reduces shrinkage and cracking
- Works well with colours and oxides

### SUBSTRATE PREPARATION:

It is important to ensure the substrate surface is clean and free from dust and loose material. Old paint should be removed, as should oil, grease, wax, curing compounds and surface laitance etc. Substrate surfaces should be pre dampened with water, with any excess brushed off.

### MIXING:

Add CEMIX® EASYPLI to 2/3 of water in mixer, add 1/2 sand then cement, add remaining sand and balance of water to required consistency. There is no need to over mix mortar, a maximum of 5 minutes should be sufficient. To hand mix add and mix CEMIX® EASYPLI to a small amount of water, mix into dry sand/cement mixture, then add water to desired consistency.

### COVERAGE:

Use at a rate of 30gm / 40kg bag of Portland cement. Usage is dependant on the sand or cement type and condition. More or less can be used to suit but do not overdose. Each container of CEMIX® EASYPLI will plasticise the following amount of bags of cement (40kg)

- 250gms = 8 bags
- 700gms = 23 bags
- 1.2kg = 40 bags
- 2.5kg = 83 bags
- 10kg = 333 bags

### STORAGE & SHELF LIFE:

Store in dry place and shake well before use.

### CLEANING:

Clean all tools with water & brush immediately after use.

**Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.**
